Student

Summary

Highly motivated student with a strong understanding of project management principles, including the Project Management Body of Knowledge (PMBOK) framework. Possesses theoretical knowledge of project lifecycle phases (Initiation, Planning, Execution, Monitoring & Controlling, and Closure), and the ten knowledge areas defined by PMBOK. Familiar with key project management tools and techniques such as Work Breakdown Structure (WBS) and stakeholder management. Eager to apply these concepts in a practical setting and gain hands-on experience.

Skills

* **Project Management Fundamentals:** PMBOK, Project Lifecycle, Process Groups, Knowledge Areas
* **Scope Management:** WBS, Requirements Gathering, Scope Definition, Scope Validation
* **Stakeholder Management:** Stakeholder Identification, Stakeholder Analysis, Communication Planning
* **Risk Management:** Risk Identification, Risk Analysis, Risk Response Planning

Projects & Activities

* **Project Management Research & Documentation:** Compiled comprehensive notes and analysis on project management methodologies, focusing on PMBOK principles, including scope management, procurement, and stakeholder analysis. Demonstrates a deep understanding of the theoretical framework. *(Evidence available upon request)*
